PHOTOGRAPHY & ARCHIVES WORKSHOP PROGRAM

one Foundation
This series of workshops will guide participants through a range of photographic mediums, introducing styles and methods of creating photographic collections. The intention being that participants can go on to produce bodies of work that are representative of their lives and of those in our communities.

The SJPA Collection has been built over nearly 150 years, documenting the work of the Société but also Island life. To broaden representation with the collection we want to offer workshops that encourage our island community to take an active role in telling their stories.

Over the course of four workshops and three catch up meetings, participants will produce two zines and a collection of images for submission to the SJPA collection. The ultimate aim is that participants will go on to continue producing photographic collections.

Workshop program:
1. Collections: introduction to archives
2. Portraits: people that define us
3. Objects: artefacts from our community
4. Space: the places we inhabit
